

PRINCE2® CERTIFICATION (Foundation and Practitioner)

As pressure increases for public servants and those in the private sector to deliver projects on time, to the required specification and within budget, project management has become a necessity in both private and public sector. PRINCE2 for both Private and Public Sector is an examination based programme that gives delegates accreditation at PRINCE2 Foundation and Practitioner Levels. The programme provides in-depth training on professional project management, helping public and private sector officials to meet project objectives within project tolerances.
